

Trends in STEM Education and Job Relatedness

Rephael Berkooz, Mingyuan Li

The groups in the center are jobs held by graduates, with the most STEM-related jobs on the right, descending to the left. The upper group of three is our selected STEM majors, and the lower group is our selected non-STEM majors.

The link color indicates change over time, with green indicating less majors in a given job, the red indicating more majors in a given job. Link width indicates the total amount of majors in a given job.
